---

## Summary

Current first year of sophomore standing at Cal Poly SLO studying software engineering with a strong passion for the software and technology industry. Extensive experience with programming, and instructing. Love to work cooperatively with others, especially within the context of a team. Strong communication and interpersonal skills.

---

## Projects and Experience

### CourseConnect

- Created and launched [www.courseconnect.net](http://www.courseconnect.net) during 2020.
- A social networking platform which connects students based on their high school classes.
- Developed front end (JS, CSS, HTML, JQuery), back end (Python), and leading an ongoing marketing campaign.

### Code Ninjas Encinitas

- Instructor Mar 2021 - Mar 2022 (1 year)
- Taught numerous languages and platforms including Java, Javascript, Python, Lua (Roblox), and Scratch.

### Contractor for Sequoia West Properties

- Built and maintained a software solution which addressed the management and data retrieval regarding housing leads.
- Built using Python, hosted on VPS, and utilizes several external APIs including Zillow and the Google sheets API.

### Open Source Projects

- Some of my other open source projects can be found below.
